## COUNTRY GENTLEMAN

Ears 7-8 in., cob small and  
densely covered with long slender  
white kernels, without row forma-  
tion. An especially fine quality  
corn of late maturity.

Every ear of our sweet corn seed stock is field selected just after the eating or canning stage. Earliness, type, uniformity, and stalk receive careful consideration and in addition we carry an annual program of hybridizing and top crossing in our Trial Grounds.

## QUALITY

**A**LL of our peas and beans are grown in the West, in a dry climate under irrigation where there is the greatest freedom from disease. The stock seed has been bred up to a high degree of perfection and is backed by the accumulated experience of over a half century as Growers specializing in the growing of Peas and Beans.

## BREEDING

- The Trial Ground is the Rock Foundation on which the House of Quality must be built if the structure is to endure.
- A 240 acre irrigated ranch near Idaho Falls is devoted to breeding, selecting, and hybridizing of Peas, while similar work on Beans is carried out on our 80 acre ranch near Twin Falls, Idaho.
- Visiting seedsmen or canners are always welcome and will be shown every courtesy by our Local Managers.
- Come out and see what we are doing.
